

Sub Activity 5.5

Portrayal Catalogue Builder (v 0.8.2)

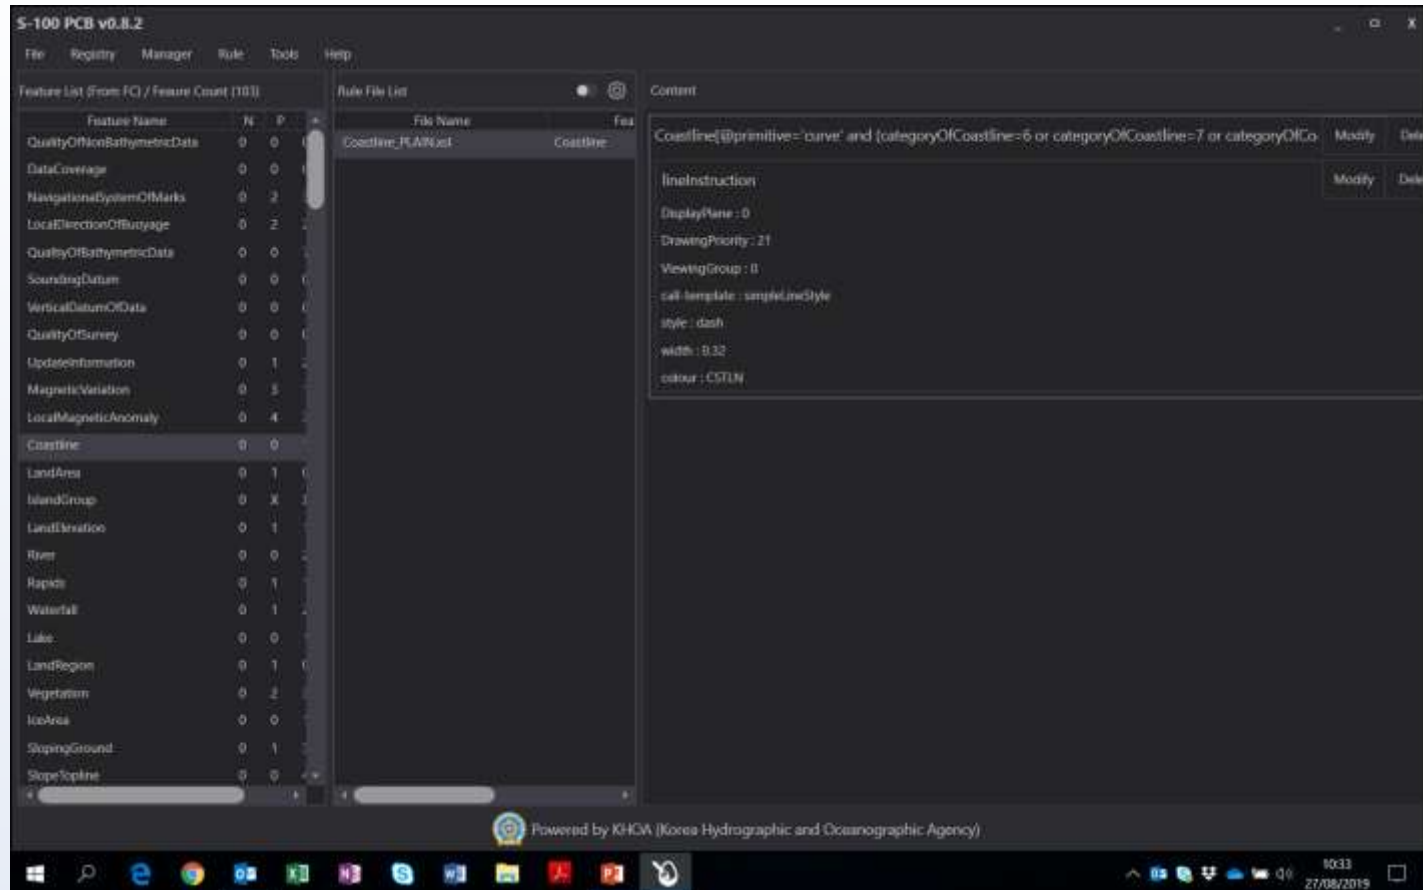

Gert Morlion, De Vlaamse Waterweg
Regensburg

Results

- **Installation:** no problem
- **No connection with database registry** (need to use a file delivered by KHOA)
- **Usability:**
 - not very user friendly
 - too many bugs -> not possible to test app properly
- **Language:** some spelling mistakes

Main screen

Once you wear black, you never go back

Good to know

- **Before creation PC, everything needs to be defined:**
 - pixmap, symbols, line styles, area fills, font, display modes, viewing groups, ...
- **Symbol definitions:**
 - Select path and all fields are extracted from SVG;
- **S-52 Lookup table** can be converted into **LUA scripts** (FC and Lookup table needed);
- Rules can be **developed** with PCB but only as **XSLT**;
- At the moment we can't create S-401 PC without S-401 FC.
